As a curious and driven individual, I thrive on challenges, I'm eager to learn and willing to play different roles.

I'm seeking a comprehensive understanding of the company and its operations, allowing me to identify areas where I can make meaningful contributions. At this stage in my career, I'm focused on improving my technical skills.

Skills

- o Designing Test Plans
- o Documentation
- o Communication
- o Automation
- o Coding (knowledge in several languages and frameworks)

Education

ISCTE IUL
Instituto Universitário de Lisboa

Computer Engineering
September 2015 -

Language

English **Fluent**
Portuguese **Native**

Work Experience

Junior Dev

Fashion Social Platform

Contributed to a project that involved connecting Machine Learning to Social Network. My responsibilities included researching and implementing Google Vision and Google ML tools. The backend was developed in Spring (Java) and the frontend in React (Javascript)

September 2019 - January 2020

QA Engineer

Android Automotive AppStore

Designed test cases and test flows, performed functional testing and documented my findings. Additionally, I created automated functions to process and analyze the data fed to the sales team, streamlining the process and increasing efficiency. To conduct testing, we used tools like Postman, Android Studio, and Charles. In addition, we wrote scripts in Python, Bash, and shell to enable some tests due to the lack of hardware. Management of the hardware used for testing, was also handled by our team.

July 2020 - July 2022

QA Engineer

Restaurant Management Platform

Wrote comprehensive test cases for the entire website test flow and ran automated tests. We used checked the code's cleanliness in DataDog to ensure it met the required standards. Lastly, I created extensive documentation to facilitate the development and maintenance of the project.

September 2022 - November 2022
